

Do Myri-10G Network Adapters support 10GBase-LRM SFP+ transceiver modules?

Model:

N/A

Software:

N/A

Operating System:

N/A

Information:

Our Myri-10G **8A** and **8B** (10G-PCIE-8A*, 10G-PCIE-8B*, and 10G-PCIE2-8B*) network adapters do not support 10GBase-LRM SFP+ transceiver modules or WDM SFP+ modules.

However, our Myri-10G **8C** (10G-PCIE2-8C*) adapters, we do support LRM and WDM 10G SFP+ modules.

The SFP+ ports on Myri-10G Network Adapters can be used with SFP+ optical-fiber transceivers for 10GBase-SR, 10GBase-LR, and other communication over serial fiber, or with Direct Attach twinax copper cables.

For more details, refer to the Guide to [Myri-10G PHYs \(pdf\)](#)
